ADVENTURE ADD-ON

Paintball – one of the most emotional tactic field games, gaining increasing popularity in recent years. Perfect for those who seek for the rush of adrenaline. Participants divided into two subgroups fight to eliminate the opponents from the play. Each player is armed with a “paintball marker” a carbon dioxide or compressed-gas-powered replica of the fire-arm, shooting with the paint filled, breakable, gelatin paintballs. Participants are dressed in full protective gear, including goggles, masks and uniforms.
