ADVENTURE ADD-ON

■ **Kolobrzeg** – for many centuries an important coastal fortress. Most of the fortifications were built in the 17th and 19th centuries, and some of the compounds are still to be found intact. From the 19th century the town started to gain an importance as a sea resort and spa. One of the city's highlights is the City Hall built in 1832 in the Gothic Revival style, surrounded by the scenic streets of the Old Town. Sea boulevard stretching along the sandy beach, with the old lighthouse dating back to the 17th century is a perfect place for the evening strolls.
